

## INTRODUCING THE FCCC MT50e

The MT50e blends the efficiency and performance of an electric vehicle with the undisputed strength and ruggedness that's made Freightliner Custom Chassis Corporation the most reliable chassis on the market.

Featuring an efficient and powerful battery system from Proterra with over 10 million miles of in-service history, the MT50e features 226 kWh, a range of 200 kms of energy capacity and an all-electric, zero-emission drive system.

The integration with the charging systems by Proterra makes it an easy one-stop-shop for vehicle and charging system set up, purposely built for commercial applications.

### MT50e Chassis

The chassis is designed to accommodate the same body dimensions as MT gas & diesel chassis products, meaning existing bodies can be used with little change and can integrate into existing fleets seamlessly.

### Integrated Safety

The MT50e features FCCC's DriveTech suite of safety options, including:

- In-dash 360-degree cameras & OptiView
- Lane-departure warnings
- Collision mitigation
- Adaptive cruise control
- Active cruise control graphics
- Integrated steering wheel controls.

**Contact First Truck Centre to find out how you can get your hands on one of the Q4 pre-series units made available.**
